Thin Solid Films 286 (1996) 339–343

thin solid films

# Subject Index of Volume 286

Accelerated wear
optical characterization of sputtered a-C:H overcoats: relationship to accelerated wear testing, film composition and substrate temperature, 59
Adhesion
measurements of the debond energy for thin metallization lines on dielectrics, 203
thermal stability of metallized CVD diamond, 264
Alloys
lattice orientation relation of the $AuIn_2$ phase in the alloying process of gold–indium films on mica, 136
$LaB_6$-based, Zr-alloyed, decorative hard coatings, 188
high temperature tin–copper joints produced at low process temperature for stress reduction, 213
Alumina films
surface roughness of alumina films deposited by reactive r.f. sputtering, 45
Aluminium oxide
the structure of Pt–$Al_2O_3$ composite films prepared by pulsed laser deposition technique, 49
studies on the morphology of $Al_2O_3$ thin films grown by atomic layer epitaxy, 54
preparation of regularly structured porous metal membranes with two different hole diameters at the two sides, 88
Amorphous materials
a-$SiSn_x$:H thin films prepared by ion beam assisted deposition, 80
Annealing
structurally stable composite Pd–Ag alloy membranes: Introduction of a diffusion barrier, 72
RTA and stoichiometry effect on the thermochromism of $VO_2$ thin films, 219
Atomic force microscopy
studies on the morphology of $Al_2O_3$ thin films grown by atomic layer epitaxy, 54
highly oriented polytetrafluoroethylene films: a force microscopy study, 98
grain boundary enhanced oxygen out-diffusion in annealed polycrystalline Si/$SiO_2$/crystalline Si structures, 317

Borides
$LaB_6$-based, Zr-alloyed, decorative hard coatings, 188

Cadmium stannate
recent developments in RF sputtered cadmium stannate films, 274
Cadmium sulphide
plasma-deposited CdS layers from (o-phen)bis(diethyldithiocarbamate) cadmium, 122
Ceramics
thin film growth of gadolinia by metal–organic chemical vapour deposition (MOCVD), 64
dry and wet corrosion behaviour of AISI 304 stainless steel coated by sol–gel $ZrO_2$–$CeO_2$ films, 127
Chemical vapor deposition (CVD)
vertical thin-film-edge field emitters: fabrication by chemical beam deposition, imaging of cathodoluminescence and characterization of emission, 92
Chemical vapour
a model describing the energy distribution of ions bombarding electrodes in an RF-plasma reactor, 159
Chemical vapour deposition (CVD)
thin film growth of gadolinia by metal–organic chemical vapour deposition (MOCVD), 64
Clusters
Rh particle growth on insulator substrates: RHEED study, 330
Coatings
dry and wet corrosion behaviour of AISI 304 stainless steel coated by sol–gel $ZrO_2$–$CeO_2$ films, 127
$LaB_6$-based, Zr-alloyed, decorative hard coatings, 188
growth and characterization of Ta/W multiscalar multilayer composite films, 196
thermal stability of metallized CVD diamond, 264
Cobalt oxide
the observation of Co film oxidation on Si and $SiO_2$ substrates, 295
Computer simulation
a model describing the energy distribution of ions bombarding electrodes in an RF-plasma reactor, 159
numerical simulation of the characteristics of the different metallic species falling on the growing film in d.c. magnetron sputtering, 305
Conductivity
transport properties in oxygen-doped cobalt phthalocyanine thin film devices, 277
Copper
$WN_x$ diffusion barriers between Si and Cu, 170
high temperature tin–copper joints produced at low process temperature for stress reduction, 213
Corrosion
dry and wet corrosion behaviour of AISI 304 stainless steel coated by sol–gel $ZrO_2$–$CeO_2$ films, 127
Crystalllization
correlation between the density of $TiO_2$ films and their properties, 32

Deformation
deformation and fracture in microlaminates, 1
Deposition process
preparation of ZnO thin films using the flowing liquid film method, 35
a-$SiSn_x$:H thin films prepared by ion beam assisted deposition, 80
highly oriented polytetrafluoroethylene films: a force microscopy study, 98
dry and wet corrosion behaviour of AISI 304 stainless steel coated by sol–gel $ZrO_2$–$CeO_2$ films, 127
preparation and characterization of lithium metaborate thin films obtained by a sol–gel method, 141
electrodeposition of $CuInS_2$ from aqueous solution (II). Electrodeposition of $CuInS_2$ film, 151

Elsevier Science S.A.

a model describing the energy distribution of ions bombarding electrodes in an RF-plasma reactor, 159
high temperature tin–copper joints produced at low process temperature for stress reduction, 213
vacuum vapour deposition of phthalimide and phthalanhydride derivatives on the substrates covered with monolayer films, 227
electrochemical codeposition of indium and gallium for chalcopyrite solar cells, 259
Depth profiling
structurally stable composite Pd–Ag alloy membranes: Introduction of a diffusion barrier, 72
Diamond
thermal stability of metallized CVD diamond, 264
Dielectrics
measurements of the debond energy for thin metallization lines on dielectrics, 203
Diffusion
$WN_x$ diffusion barriers between Si and Cu, 170
interdiffusion in Co/C soft X-ray multilayer mirrors, 176
thermal stability of metallized CVD diamond, 264
electrical passivation of B-doped Si through thin films used in VLSI fabrication, 299

Electrical properties and measurements
preparation of ZnO thin films using the flowing liquid film method, 35
preparation and characterization of lithium metaborate thin films obtained by a sol–gel method, 141
electrical state of the water surface determined by the moving electrode set-up, 223
transport properties in oxygen-doped cobalt phthalocyanine thin film devices, 277
Electrochemistry
electrodeposition of $CuInS_2$ from aqueous solution (II). Electrodeposition of $CuInS_2$ film, 151
studies on the aggregation behaviour of a side-chain liquid crystalline polymer in Langmuir–Blodgett films, 232
properties of insulated gate field-effect transistors with a polyaniline gate electrode, 252
Electron emission
vertical thin-film-edge field emitters: fabrication by chemical beam deposition, imaging of cathodoluminescence and characterization of emission, 92
Electron energy loss spectroscopy (EELS)
high-resolution electron energy loss spectroscopy of thin crystalline highly oriented films of poly(tetrafluoroethylene), 321
Electron microscopy
the structure of Pt–$Al_2O_3$ composite films prepared by pulsed laser deposition technique, 49
Ellipsometry
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 164
Epitaxial growth
crystallography of epitaxial growth of $Fe_{16}N_2$ single-crystal films on NaCl substrates, 146
Epitaxy
studies on the morphology of $Al_2O_3$ thin films grown by atomic layer epitaxy, 54
lattice orientation relation of the $AuIn_2$ phase in the alloying process of gold–indium films on mica, 136
Rh particle growth on insulator substrates: RHEED study, 330
Evaporation
dye-metal oxide composite thin films for decorative applications, 154

$\alpha''$-$Fe_{16}N_2$
crystallography of epitaxial growth of $Fe_{16}N_2$ single-crystal films on NaCl substrates, 146

Field effect
properties of insulated gate field-effect transistors with a polyaniline gate electrode, 252
Field emission
vertical thin-film-edge field emitters: fabrication by chemical beam deposition, imaging of cathodoluminescence and characterization of emission, 92
Fourier transform infrared spectroscopy
preparation and characterization of lithium metaborate thin films obtained by a sol–gel method, 141
Fracture
deformation and fracture in microlaminates, 1

Gallium
electrochemical codeposition of indium and gallium for chalcopyrite solar cells, 259
Gallium arsenide
characterization of GaAs buffer layer function in GaAs/InP strained structure grown by MBE, 107
Gold
a new method for preparing nanometer-scale particles onto LB films, 37
preparation of regularly structured porous metal membranes with two different hole diameters at the two sides, 88
lattice orientation relation of the $AuIn_2$ phase in the alloying process of gold–indium films on mica, 136
Growth mechanism
preparation of ZnO thin films using the flowing liquid film method, 35

Halides
a new method for preparing nanometer-scale particles onto LB films, 37
effect of halide ions on the formation and dissolution behaviour of zirconium oxide, 289
Hardness
growth and characterization of Ta/W multiscalar multilayer composite films, 196
Heat treatment
interdiffusion in Co/C soft X-ray multilayer mirrors, 176
High energy electron diffraction (RHEED)
Rh particle growth on insulator substrates: RHEED study, 330
High saturation magnetization
crystallography of epitaxial growth of $Fe_{16}N_2$ single-crystal films on NaCl substrates, 146
Hydrogen
electrical passivation of B-doped Si through thin films used in VLSI fabrication, 299
Hydrogenated carbon
optical characterization of sputtered a-C:H overcoats: relationship to accelerated wear testing, film composition and substrate temperature, 59

Indium
lattice orientation relation of the $AuIn_2$ phase in the alloying process of gold–indium films on mica, 136
electrochemical codeposition of indium and gallium for chalcopyrite solar cells, 259
Indium phosphide
characterization of GaAs buffer layer function in GaAs/InP strained structure grown by MBE, 107
Infrared spectroscopy
high-resolution electron energy loss spectroscopy of thin crystalline highly oriented films of poly(tetrafluoroethylene), 321
Interfaces
measurements of the debond energy for thin metallization lines on dielectrics, 203

Ion bombardment
a model describing the energy distribution of ions bombarding electrodes in an RF-plasma reactor, 159

Langmuir-Blodgett films
a new method for preparing nanometer-scale particles onto LB films, 37
vacuum vapour deposition of phthalimide and phthalanhydride derivatives on the substrates covered with monolayer films, 227
studies on the aggregation behaviour of a side-chain liquid crystalline polymer in Langmuir–Blodgett films, 232
a new azo rare earth coordination compound for second-order non-linear optical Langmuir–Blodgett films, 237
low-temperature plasma treatment of magnesium stearate Langmuir–Blodgett films, 241
effects of $NO_2$ oxidizing gas on a novel phthalocyanine Langmuir–Blodgett thin film, 256
Lanthanides
a new azo rare earth coordination compound for second-order non-linear optical Langmuir–Blodgett films, 237
Laser ablation
the structure of Pt–$Al_2O_3$ composite films prepared by pulsed laser deposition technique, 49
Laser deposition
surface and buried-interfacial reactivity of iron and $MoS_2$: a study of laser-deposited materials, 282

Magnetic media
optical characterization of sputtered a-C:H overcoats: relationship to accelerated wear testing, film composition and substrate temperature, 59
Metallization
measurements of the debond energy for thin metallization lines on dielectrics, 203
Metals
numerical simulation of the characteristics of the different metallic species falling on the growing film in d.c. magnetron sputtering, 305
Microlaminates
deformation and fracture in microlaminates, 1
Molecular beam epitaxy (MBE)
characterization of GaAs buffer layer function in GaAs/InP strained structure grown by MBE, 107
Molybdenum disulfides
surface and buried-interfacial reactivity of iron and $MoS_2$: a study of laser-deposited materials, 282
Monolayers
vacuum vapour deposition of phthalimide and phthalanhydride derivatives on the substrates covered with monolayer films, 227
studies on the aggregation behaviour of a side-chain liquid crystalline polymer in Langmuir–Blodgett films, 232
Mössbauer spectroscopy
surface and buried-interfacial reactivity of iron and $MoS_2$: a study of laser-deposited materials, 282
Multilayers
interdiffusion in Co/C soft X-ray multilayer mirrors, 176
multilayer relaxation features on (100) and (111) surfaces of $\beta$-SiC, 184
growth and characterization of Ta/W multiscalar multilayer composite films, 196

Nanostructures
a new method for preparing nanometer-scale particles onto LB films, 37
fabrication of $La_{1-x}Sr_xFe_{1-y}Co_yO_3$ sensitive ceramics, nanocrystalline thin films and the manufacture of the NCTF-OSFET gas sensing device, 270
Nickel
preparation of regularly structured porous metal membranes with two different hole diameters at the two sides, 88
Nitrides
$WN_x$ diffusion barriers between Si and Cu, 170
Nitrogen dioxide
effects of $NO_2$ oxidizing gas on a novel phthalocyanine Langmuir–Blodgett thin film, 256

Optical properties
association of some phthalocyanines: from solutions to thin films, 40
preparation and characterization of lithium metaborate thin films obtained by a sol–gel method, 141
dye-metal oxide composite thin films for decorative applications, 154
a new azo rare earth coordination compound for second-order non-linear optical Langmuir–Blodgett films, 237
Organic substances
association of some phthalocyanines: from solutions to thin films, 40
dye-metal oxide composite thin films for decorative applications, 154
vacuum vapour deposition of phthalimide and phthalanhydride derivatives on the substrates covered with monolayer films, 227
effects of $NO_2$ oxidizing gas on a novel phthalocyanine Langmuir–Blodgett thin film, 256
transport properties in oxygen-doped cobalt phthalocyanine thin film devices, 277
Oxidation
effects of $NO_2$ oxidizing gas on a novel phthalocyanine Langmuir–Blodgett thin film, 256
Oxides
dye-metal oxide composite thin films for decorative applications, 154
effect of halide ions on the formation and dissolution behaviour of zirconium oxide, 289

Palladium
structurally stable composite Pd–Ag alloy membranes: Introduction of a diffusion barrier, 72
Physical vapour deposition
numerical simulation of the characteristics of the different metallic species falling on the growing film in d.c. magnetron sputtering, 305
Physical vapour deposition (PVD)
investigation of the stresses and stress intensity factors responsible for fracture of thin protective films during ultra-micro indentation tests with spherical indenters, 111
RTA and stoichiometry effect on the thermochromism of $VO_2$ thin films, 219
Plasma processing and deposition
plasma-deposited CdS layers from (o-phen)bis(diethyldithiocarbamate) cadmium, 122
low-temperature plasma treatment of magnesium stearate Langmuir–Blodgett films, 241
Platinum
vertical thin-film-edge field emitters: fabrication by chemical beam deposition, imaging of cathodoluminescence and characterization of emission, 92
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 164
Polymers
highly oriented polytetrafluoroethylene films: a force microscopy study, 98
studies on the aggregation behaviour of a side-chain liquid crystalline polymer in Langmuir–Blodgett films, 232

properties of insulated gate field-effect transistors with a polyaniline gate electrode, 252
high-resolution electron energy loss spectroscopy of thin crystalline highly oriented films of poly(tetrafluoroethylene), 321

Raman spectroscopy
optical characterization of sputtered a-C:H overcoats: relationship to accelerated wear testing, film composition and substrate temperature, 59
Reflection
Rh particle growth on insulator substrates: RHEED study, 330
RF sputtering
recent developments in RF sputtered cadmium stannate films, 274
Rutherford backscattering spectroscopy
RTA and stoichiometry effect on the thermochromism of $VO_2$ thin films, 219

Schottky barrier
transport properties in oxygen-doped cobalt phthalocyanine thin film devices, 277
Secondary ion mass spectrometry
grain boundary enhanced oxygen out-diffusion in annealed polycrystalline $Si/SiO_2$/crystalline Si structures, 317
Second-harmonic generation
a new azo rare earth coordination compound for second-order nonlinear optical Langmuir–Blodgett films, 237
Semiconductors
a-$SiSn_x$:H thin films prepared by ion beam assisted deposition, 80
Silicon
a-$SiSn_x$:H thin films prepared by ion beam assisted deposition, 80
$WN_x$ diffusion barriers between Si and Cu, 170
the observation of Co film oxidation on Si and $SiO_2$ substrates, 295
electrical passivation of B-doped Si through thin films used in VLSI fabrication, 299
Silicon oxide
the observation of Co film oxidation on Si and $SiO_2$ substrates, 295
electrical passivation of B-doped Si through thin films used in VLSI fabrication, 299
grain boundary enhanced oxygen out-diffusion in annealed polycrystalline $Si/SiO_2$/crystalline Si structures, 317
Silver
structurally stable composite Pd–Ag alloy membranes: Introduction of a diffusion barrier, 72
Single crystal films
crystallography of epitaxial growth of $Fe_{16}N_2$ single-crystal films on NaCl substrates, 146
Single-phase
recent developments in RF sputtered cadmium stannate films, 274
Solar cells
electrodeposition of $CuInS_2$ from aqueous solution (II). Electrodeposition of $CuInS_2$ film, 151
electrochemical codeposition of indium and gallium for chalcopyrite solar cells, 259
Solid electrolyte interface
thin film growth of gadolinia by metal–organic chemical vapour deposition (MOCVD), 64
Sputtering
$LaB_6$-based, Zr-alloyed, decorative hard coatings, 188
numerical simulation of the characteristics of the different metallic species falling on the growing film in d.c. magnetron sputtering, 305
Sputtering deposition
surface roughness of alumina films deposited by reactive r.f. sputtering, 45
Stress
correlation between the density of $TiO_2$ films and their properties, 32
investigation of the stresses and stress intensity factors responsible for fracture of thin protective films during ultra-micro indentation tests with spherical indenters, 111
Structural properties
preparation of regularly structured porous metal membranes with two different hole diameters at the two sides, 88
Sulphides
electrodeposition of $CuInS_2$ from aqueous solution (II). Electrodeposition of $CuInS_2$ film, 151
Surface morphology
studies on the morphology of $Al_2O_3$ thin films grown by atomic layer epitaxy, 54
highly oriented polytetrafluoroethylene films: a force microscopy study, 98
low-temperature plasma treatment of magnesium stearate Langmuir–Blodgett films, 241
Surface roughness
surface roughness of alumina films deposited by reactive r.f. sputtering, 45
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 164
Surface structure
air pockets in thin porous platinum films studied by spectroscopic ellipsometry, 164

Thermal desorption
low-temperature plasma treatment of magnesium stearate Langmuir–Blodgett films, 241
Thin films
investigation of the stresses and stress intensity factors responsible for fracture of thin protective films during ultra-micro indentation tests with spherical indenters, 111
Tin
high temperature tin–copper joints produced at low process temperature for stress reduction, 213
Titanium oxide
correlation between the density of $TiO_2$ films and their properties, 32
Transmission electron microscopy (TEM)
the observation of Co film oxidation on Si and $SiO_2$ substrates, 295

Vacancies
grain boundary enhanced oxygen out-diffusion in annealed polycrystalline $Si/SiO_2$/crystalline Si structures, 317
Vanadium oxide
RTA and stoichiometry effect on the thermochromism of $VO_2$ thin films, 219

Water
electrical state of the water surface determined by the moving electrode set-up, 223
Work function
properties of insulated gate field-effect transistors with a polyaniline gate electrode, 252

X-ray diffraction
characterization of GaAs buffer layer function in GaAs/InP strained structure grown by MBE, 107
plasma-deposited CdS layers from (o-phen)bis(diethyldithiocarbamate) cadmium, 122
interdiffusion in Co/C soft X-ray multilayer mirrors, 176

growth and characterization of Ta/W multiscalar multilayer composite films, 196
X-ray photoelectron spectroscopy
surface and buried-interfacial reactivity of iron and $MoS_2$: a study of laser-deposited materials, 282
Zinc oxide
preparation of ZnO thin films using the flowing liquid film method, 35
Zirconium
effect of halide ions on the formation and dissolution behaviour of zirconium oxide, 289
